

Real People. Real Protection.

Trusted cyber security expertise, delivered with a personal approach.

A Cyber Security Partner You Can Rely On.

Cyber security doesn't have to feel complex, impersonal, or overwhelming. At Blue Cube Security, we work alongside your business to deliver protection that's practical, effective, and built around real needs.

With over 25 years of experience, we support organisations of all sizes across every stage of their cyber journey. From day-to-day protection to specialist expertise and long-term strategy, our focus is simple: keeping your business secure, compliant, and resilient, without unnecessary complexity.

We combine advanced technology with human expertise, giving you clear advice, responsive support, and confidence in your security decisions.

Industry Certifications & Certified Standards:

Introducing Blue Cube Security Flexi Points

This is a smarter, premium retainer model that gives clients flexibility, speed and control.

Rather than rigid contracts or slow procurement cycles, Flexi Points let you invest upfront and draw down on services as and when you need them.

This removes delays and reduces friction, giving you:

- Faster access to experts
- Flexible use across services
- Better value from your security investment
- Confidence that support is always available

It's cyber security support... on your terms.

What We Do

We deliver cyber security in a way that fits your business, whether you need full management, expert support, or the right solutions in place.

Managed Cyber Services

Ongoing monitoring, management, and response that keeps your systems protected around the clock, reducing risk and pressure on internal teams.

- Firewall Management
- Vulnerability Management
- Patch Management
- Web Application Scanning
- Managed Detection & Response
- Security Operations Centre (SOC)

Professional Services

Expert-led support for projects, assessments, compliance, and incident response, providing clarity and direction when it matters most.

- Technical Consulting & Architectural Design
- Deployment & Implementation
- Project Management
- Incident Response / Response Readiness
- Penetration Testing
- AI Governance & Risk Assurance
- DORA Services
- Cybersecurity Maturity Assessment (CMA)

Cyber Security Solutions

Carefully selected technologies designed, implemented, and supported by people who understand your environment and your challenges.

- Network Security
- Endpoint Security
- Vulnerability Management
- Patch Management
- Security Awareness Training
- Privilege Access Management (PAM)
- Application Security
- Encryption Key Management
- Data Security Fabric
- Secure Access Service Edge (SASE)

Every service is tailored. No unnecessary noise. Just security that works.

Why Blue Cube Security?

Because technology alone isn't enough.

We believe the strongest security comes from trusted relationships, clear communication, and people who genuinely care about protecting your business.

Our clients choose us for:

- A friendly, approachable team of real security experts
- Clear advice that's direct and easy to act on
- Flexible services that adapt as their business grows
- Long-term partnerships built on trust and results

We don't just protect systems, we support people.

Trusted partnerships with leading cyber security vendors help strengthen the solutions we deliver.

Let's Secure Your Business, Together.

If you're looking for a cyber security partner that's experienced, approachable, and invested in your success, we'd love to talk.
